

1

Dual LED Displays Charging Case: Wireless earbuds with LED display make it obvious to show the battery power of the case and ear buds. The remaining power in percentage on the screen is shown to the right of the bluetooth headphones. The left side is assigning to a charging process of each bud, there are separated power consumption indicators by 4 grids in total, each grid represents 25% power of bud. During Charging, the LED indicator light will flash. 400mAh battery capacity charging case can provide extra 4 times full charging for both earbuds, each earbud can last 6H on single charging.

2

Comfortable wear: not plugging the ears of the listening mode, not bulging eardrums, the ear is not swollen, not sore, transparent and comfortable, close to the natural listening experience, a healthier way of listening.

3

One Button Control and Auto Pairing: Compared with touch control, button control is easy so that you can obviate any operations and don't need to remember its instruction. When you pick wireless earphones out of the charging case, they'll automatically connect to the paired previous device. The range can reach up to 33ft away. When you put it back, the bluetooth earphones shut down and are recharging.

4

IPX5 Waterproof: Wireless earbuds charging case support Type-C cable charging. These wireless headphones are rating at IPX5 waterproof, the nano-coating on earbuds surface can prevent water and sweat from penetrating, which can use as sport wireless headsets. You can listen to the music while running, working, reading, sleeping, meeting, etc.

5

Lightweight body design: ultra-lightweight body allows you to experience a truly sensation-free wear, stable fit for different ear shapes, skin-friendly silicone material to reduce the friction with the ear contour, stable and comfortable, wildly flinging not to fall!
